PROFESSIONAL SUMMARY

Full-Stack AI Engineer with 2 years building and shipping production-grade AI products end to end — as the sole engineer working directly with founders. Strong across React/Next.js front-ends, Node.js and Python (FastAPI) back-ends, and Azure/AWS cloud, with deep hands-on LLM and AI-agent work (Claude, OpenAI, ElevenLabs, LangChain, RAG). Adds machine learning (pandas, scikit-learn) and Docker-based deployment to deliver data-driven, production-ready solutions to complex business problems.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, SQL

Machine Learning & Data: pandas, NumPy, scikit-learn, Matplotlib, Seaborn, predictive & statistical modeling, feature engineering, model evaluation, EDA, data visualization

Generative & AI Agents: LLM & agent systems (Claude, OpenAI, Azure OpenAI, ElevenLabs), LangChain, RAG, embeddings, vector databases (Chroma / FAISS), tool/function calling, prompt engineering, N8N

Frontend: React.js, Next.js, HTML5, CSS3, ShadCN UI, Bootstrap

Backend & APIs: Node.js, Express.js, NestJS, FastAPI, WebSockets, REST APIs, Microservices, OAuth 2.0, Webhooks

Databases: MongoDB, PostgreSQL, SQLite

Cloud & DevOps: Azure (AD, App Service, Static Web App, Blob Storage, VM), AWS (EC2, S3, Route 53), Docker, GitHub Actions, Azure DevOps, CI/CD

AI Dev Tools: Cursor, Claude Code

PROFESSIONAL EXPERIENCE

Full-Stack AI Engineer | Ridhira Living Pvt Ltd, Hyderabad

Mar 2025 – Present

- Engineered an AI outbound calling agent (ElevenLabs Conversational AI + Twilio) with custom booking tools (slot availability, guest creation, confirmation) and intent-aware prompts, automating booking and re-engagement of cancelled/missed appointments with live Zenoti sync.
- Built a Python lead-generation pipeline that pulls LinkedIn profiles via SignalHire across multiple ICPs and uses Claude to score, shortlist, and generate buyer rationale that feeds qualified leads into the sales pipeline.
- Architected a unified booking backend wrapping the Zenoti POS API to serve multiple channels from a single set of services — web, a WhatsApp bot, and an AI calling agent — with live booking sync to Zenoti.
- Built a self-serve channel-partner portal (React + Express + Zoho CRM) replacing manual WhatsApp/spreadsheet lead workflows — a multi-tier partner network with role-based access, bidirectional Zoho CRM sync with deal-stage history visible to partners, automated stage-change notifications, and a weekly AI lead-audit that flags stale leads and reports to the sales head.
- Built a CMS-enabled real-estate listing-and-booking site with HDFC Payment Gateway token collection and a QR-based site-visit pass delivered via WhatsApp, scanned on-site to track visit status with live Zoho CRM sync and salesperson alerts.

Software Engineer | G7CR Technologies India Pvt Ltd, Bangalore

Jul 2024 – Feb 2025

- Built an AI Video Cataloguing platform (React + NestJS + Azure) that auto-extracts short highlight clips from long-form videos for a media client; integrated Azure Video Indexer for metadata, transcripts, and timestamps feeding Azure OpenAI to identify the best clips.
- Implemented real-time progress tracking via WebSockets across upload, analysis, and clip-generation stages; added Azure AD SSO (domain-restricted) and Google OAuth.
- Designed MongoDB schemas for unstructured video metadata and set up Azure DevOps CI/CD with PR-review workflows across dev and prod environments.

PROJECTS

Loan Default Prediction — ML Model & API | Python, scikit-learn, pandas, FastAPI, Docker

[GitHub ↗](#)

- EDA and feature engineering on financial data (pandas/NumPy); trained and evaluated classification models (Logistic Regression, Random Forest, XGBoost; ROC-AUC, precision/recall); deployed the best model as a Dockerized FastAPI service with Matplotlib/Seaborn risk visualizations.

AI Document Q&A Assistant (RAG) | Python, LangChain, FastAPI, React, Chroma, Docker

[GitHub ↗](#)

- Retrieval-augmented assistant answering questions over a document set using LangChain with embeddings in Chroma and a callable tool; served via a FastAPI back-end and React chat UI, containerized with Docker.

EDUCATION

B.Tech, Computer Science & Engineering (AI & ML) — Aditya University, Kakinada | Dec 2021 – Apr 2024 | GPA: 7.21/10

Polytechnic Diploma (EEE) — Usha Rama College of Engineering & Technology | Jun 2018 – Aug 2021 | 72.52%

CERTIFICATIONS

Nxtwave: React JS • Node.js • Python • Developer Foundations • Databases (2023–2024)
